# Angjele Jovanoski

**Senior Full Stack PHP Developer | Symfony · Drupal · REST APIs · Integrations**

Skopje, North Macedonia | +389 78 413 335 | gelejovanosky@gmail.com | linkedin.com/in/gelejovanoski

## Summary

Senior Full Stack PHP Developer with 10+ years of experience building websites, custom CMS platforms, business portals and API-driven backends for clients. Strong Symfony background (routing, services and dependency injection, event subscribers, Twig, Composer), the component foundation of Drupal 9/10, plus hands-on experience maintaining a Drupal 8 website. Most recently engineered Symfony and CakePHP services and REST APIs for a multi-tenant smart-ticketing SaaS used by 1M+ passengers, shipped through GitHub Actions and Jenkins CI/CD on Docker and Kubernetes. Reviews code daily and uses AI-assisted development (Claude Code) in everyday work.

## Technical Skills

- **Languages:** PHP (modern OOP), JavaScript, TypeScript, Python, SQL, HTML5, CSS3
- **PHP frameworks:** Symfony, Laravel, CakePHP, CodeIgniter, Doctrine ORM, Composer
- **CMS & templating:** Drupal 8, WordPress, custom CMS platforms, Twig
- **APIs & integrations:** REST APIs, third-party integrations, microservices, RabbitMQ, Google Cloud Pub/Sub, event-driven / asynchronous processing
- **Frontend:** responsive web design, jQuery, Bootstrap, Tailwind CSS; React and TypeScript (actively expanding)
- **Databases:** PostgreSQL, MySQL, MongoDB, SQL Server; schema design, query optimization
- **DevOps & delivery:** Git (GitHub, Bitbucket), GitHub Actions, Jenkins, Docker, Kubernetes (GKE), Datadog, Kibana (ELK)
- **Testing & ways of working:** Codeception unit, integration and acceptance tests; Agile / Scrum, Jira, Confluence; daily code review; Claude Code

## Professional Experience

**Freelance Web Developer** | Self-employed, North Macedonia — **Oct 2026 – Present**

- Build and maintain websites for local businesses (automotive, construction and real estate, metal fabrication), from client requirements through design, content and launch.

**Senior Full Stack Developer** | Proxiad SEE, Skopje — **Dec 2022 – Aug 2026**

*Client: Ubitransport (France), SaaS for public transport planning, real-time monitoring, fare design and smart ticketing*

- Engineered and refactored backend services and REST APIs in Symfony and CakePHP for a multi-tenant smart-ticketing platform used by transit networks in several cities (1M+ passengers, separate database per customer).
- Translated the client's functional requirements into technical specifications and development plans, working in Agile / Scrum with the client's product and QA teams.
- Implemented core domain rules such as single active card per passenger, legacy tag deactivation and fare usage restrictions.
- Integrated polyglot microservices (PHP, TypeScript, Python) through asynchronous messaging with RabbitMQ and Google Cloud Pub/Sub.
- Optimized complex PostgreSQL queries and high-concurrency schemas, and wrote data patch scripts for passenger registrations, fare structures and deposit tracking.
- Shipped changes through GitHub Actions and Jenkins CI/CD pipelines, developed and debugged services on Docker and Kubernetes (GKE), and monitored production with Datadog.
- Wrote Codeception acceptance, unit and integration tests for ticketing workflows to prevent regressions in production releases.
- Reviewed teammates' code daily for logic, performance and readability, helping keep code quality consistent across the team.

**Full Stack Web Developer** | Xessable, Skopje **Jun 2021 – Dec 2022**

- Built full-stack web applications, custom CMS platforms and microservices with Symfony, Laravel, CodeIgniter and WordPress.
- Designed relational database structures and built responsive UI components with JavaScript and jQuery.
- Worked with Docker development environments, Git / Bitbucket feature-branch workflows and automated unit and acceptance tests.

**Full Stack Web Developer** | Piksel Ltd, Skopje **Sep 2016 – May 2021**

- Built web applications, business portals and custom CMS platforms for clients from scratch with CodeIgniter and MySQL.
- Maintained an existing client website built on Drupal 8 (2016 – 2017), editing the site and its content.
- Designed mobile-responsive interfaces with HTML5, CSS3, JavaScript, jQuery and Bootstrap.
- Introduced automated testing with Codeception to standardize release verification and improve reliability.

**Earlier Roles** | Skopje / Gostivar **Apr 2015 – Aug 2016**

- **Full Stack Developer, Digital Dreams Team, Skopje (Sep 2015 – Aug 2016):** web applications and custom CMS solutions on CodeIgniter (MVC) and MySQL.
- **Junior Full Stack Developer, EANDU Solutions, Gostivar (Apr 2015 – Sep 2015):** CRUD modules and controller / view workflows in CodeIgniter, MySQL, jQuery and AJAX.

## Selected Projects

- EGR Global and Fundmap (Pageant Media): digital publication and market intelligence platform for the online gaming industry, and a high-capacity financial data platform for institutional asset management.
- Business websites and portals: Kat Star Nedviznosti (real estate listings), Auto Meklaren, Avto Skola Meklaren, Holland MK.

## Education & Training

- **BSc in Computer Science**, South East European University, Tetovo (2010 – 2014)
- **Claude Code - The Practical Guide**, Academind (Udemy)
